1. Applying for NID Using Mother's Citizenship (Without Father's Name)

[CHUNK_TAG: nid_special_001 | topic:nid_mothers_citizenship | source:nid_through_mothers_citizenship]

Nepali citizens whose citizenship certificate was issued in the mother's name (as per Nepal Citizenship Rules, 2063 — 4th Amendment) are eligible to register for the NID. The process follows a specific enrollment procedure at the DAO/AAO.

Step-by-step process:

Step 1 — Select Reference CC (Mother's Citizenship):

At enrollment, select 'Mother's CC' as the Reference CC. Enter the applicant's citizenship number as the Reference CC Number.

Step 2 — Enter Citizenship Data:

Enter the applicant's citizenship type, issue date, and issuing district as mandatory fields.

Step 3 — Enter Family Details:

Enter the applicant's mother's citizenship number, CC Number, issue date, issuing district, and name/surname as mandatory fields. Also enter spouse details (citizenship number, CC Number, issue date, issuing district, name/surname) based on marital status.

Step 4 — Upload Supporting Documents:

Scan and upload: the application form (Applicant form), the applicant's citizenship certificate (Applicant's CC), and the mother's citizenship certificate (Mother's CC) — all mandatory.

Step 5 — Complete Enrollment:

Scan any other required documents. Take biometric data (fingerprints, iris, photo, signature) and generate the Confirmation Page.

Note: The Confirmation Page must show the applicant's citizenship number, mother's name, address, and citizenship number.

2. Applying from a Different District

[CHUNK_TAG: nid_special_002 | topic:different_district | source:nid_circulars]

Citizens from any district can apply for NID at any DAO/AAO office — you are not restricted to the district where your citizenship was issued.

The circular from DONIDCR explicitly states: Make arrangements to provide NID-related services to citizens of other districts as well from that office.

3. Citizens Whose Details Are Unclear on Citizenship — Handling

[CHUNK_TAG: nid_special_003 | topic:unclear_citizenship_details | source:nid_circulars]

If certain details on a citizen's citizenship certificate are unclear or missing, the enrollment officer uses CIMS (Citizenship Management Information System) or citizenship records to verify and enter the data correctly.

For citizenship certificates where only the year or age is shown (no specific date), the date of birth is calculated as follows: subtract the age from the citizenship issue year, keeping the same month and day as the issue date.

For name spelling: if the English spelling of the surname is present on the citizenship, enter it as shown. If not present, derive it from the passport or educational certificate.

4. Demographic Duplicate — When System Shows Duplicate Entry

[CHUNK_TAG: nid_special_004 | topic:demographic_duplicate | source:nid_circulars]

If a demographic duplicate is detected during data entry (meaning similar data already exists in the system), the enrollment operator must enter the data offline and add a mandatory comment explaining the situation. NIN will only be issued after 'More Verification' is completed. Citizens should check their NIN status via Citizen Portal or SMS after 3 days.

5. Citizens Born After 2080 B.S. (2023 A.D.) — NIN Assigned at Birth Registration

[CHUNK_TAG: nid_special_005 | topic:nin_at_birth | source:nid_circulars]

For citizens whose date of birth is after 2080 B.S. (mid-2023 A.D.) and who already have a NIN from birth registration, the enrollment officer uses the 'With NIN Process' to complete their data registration — no separate NIN is issued.

6. Citizens Who Cannot Attend in Person (Elderly, Disabled, Children)

[CHUNK_TAG: nid_special_006 | topic:special_assistance | source:nid_circulars]

As per Nepal Gazette notice (2081 Ashadh 10), children, individuals who cannot care for themselves, people with disabilities, and senior citizens aged 90 or above who do not have a NID must not be barred from accessing services. Offices are required to facilitate and coordinate with relevant authorities to provide services to these groups.

Priority service must be provided to: elderly citizens, people with disabilities, women, and citizens in special circumstances.

7. Online Revenue Payment for NID Services

[CHUNK_TAG: nid_special_007 | topic:online_payment | source:nid_online_payment]

As per DONIDCR Regulation 2077, Rule 13, Sub-rule 3, the replacement card fee is NPR 500. Previously, citizens had to physically visit a bank to pay this fee. An online payment system has now been implemented.

Online payment portals:

- Citizen Portal: <https://citizenportal.donidcr.gov.np> (connected to the Revenue Management System of the Office of the Auditor General)
- NID Revenue Portal: <https://nid-revenue-portal.donidcr.gov.np> (digital receipt issued — no need to visit bank)

To activate the online payment system at your office, each DAO/AAO must designate one verification officer/staff member and provide their name, designation, mobile number, and email to DONIDCR.

8. Nagarik App — Digital NID

[CHUNK_TAG: nid_special_008 | topic:nagarik_app_digital_nid | source:nid_circulars]

Citizens who have completed NID enrollment and have a NIN but have not yet received their physical card can access their NID digitally via the Nagarik App. The digital NID on the Nagarik App is legally recognised once the NIN is generated.

NIN Consultation service and Citizen Portal services should be handled at the enrollment stations directly. Call center support for these services is discontinued — offices should contact DONIDCR's provincial Technical Support units for technical issues only.

9. Citizens Data Update (Correcting Errors After Enrollment)

[CHUNK_TAG: nid_special_009 | topic:citizen_data_update | source:nid_circulars]

The Citizens Data Update (CDU) system allows erroneous NID records to be corrected. When updating:

- Only ONE correction can be made per visit — multiple corrections cannot be done simultaneously.
- Supporting documents (citizenship, event registration certificate, passport, pension document) must be provided as proof.
- Only the specific erroneous field should be corrected — other citizenship documents should not be re-uploaded unnecessarily.
- The correct information must be verified before uploading to the system.
